Querydsl

Intro

About Querydsl

- Originally created by Timo Westkämper in 2010 and owned by Mysema

- Now owned by Querydsl team (Timo + others)

- Ongoing development (latest from Sep 2016)

https://github.com/zbynekvavros/querydsl-intro.git

Why to use it?

- Criteria API does it, Querydsl is more compact

- Overall more user friendly

- Spring Data support

- Spring REST API support

    - public ResponseEntity<List<Person>> findAll(@QuerydslPredicate(root = Person.class) Predicate predicate, Pageable pageable)
